

# Cold & Sparkling Undersink System

Designed for resident and commercial unlimited chilled still and sparkling water on demand

If this is for your own personal luxury, pleasing your hard working staff or saving money in your café or restaurant and you never want to purchase bottled sparkling water again, this system that provides both filtered chilled sparkling and chilled still water is for you.

Create unlimited chilled still or sparkling water in your home or office. Sparkling water is perfect on its own as a hydrating beverage. Add ice, crushed mint and a squeeze of lemon, or a handful of muddled berries, and you have a fancy drink. Sparkling water is also the perfect mixer, great for diluting anything too-sweet or too-strong, or adding to cordials and juices for a bit of a twist. Better yet, sparkling water has zero calories, which means no sugar, so is vastly better for you than soft drinks

## Features & Benefits

- Unlimited chilled & sparkling water
- Chills 16L/hr
- Separate CO2 Canister stored externally
- Stainless Steel construction
- Adjustable temperature control
- External american made filter

## Filtration:

- Superior American made high volume filter
- High flow rate with minimal pressure drop
- High sediment holding capacity filter
- High chlorine removal rate via the finely powdered densely packed carbon

## Cold & Sparkling System

Dimensions	42.5H x 24.5W x 40Dcm
Weight	Chiller 25kg gross
Delivers	Cold, Ambient Sparkling
Requirements	Power, Water, CO2
Cooling System	Silver Turbo Clean cooling system, provides improved hygiene and energy efficiency

Prices subject to change without notice

# ELF In-Line Water Filter

## Quality Filters Producing Great Tasting Water

The ELF filter produced by Omnipure the Global filter company based in the USA sets a new benchmark for long-term quality filtration of water.

These Omnipure filters are available in a range starting with the standard 10 & 1-micron carbon blocks, lead specific carbon blocks & polyphosphate carbon blocks for equipment protection from contaminants associated with hard water. This is especially important with equipment that has a heating element such as dishwashers, steam ovens & even Ice machines & Coffee machines.

The filter bodies are constructed using virgin, high-impact polypropylene which is especially ideal for use in applications where sanitary conditions are required.

All materials used in the construction of the filters are NSF &/or FDA approved.

They are a very popular filter in all fields of domestic & retail applications due to their ease of being able to be removed & replaced with a minimum of fuss.

### BUYER BEWARE

Many inferior carbon filters coming from Asian countries & positioned very cheaply in the market place, give people the false perception that they have chosen a filter that is going to give them a healthy outcome.

Nothing could be further from reality because the source of carbon in the filters dictates the quality and consequently its healthiness and safety

Carbon sourced from coal gives off dangerous carcinogens and is used in cheap filters.

Omnipure filters only use quality carbon sourced from activated coconut shell which has been washed numerous times.

## ELF P RA 190mg PHOS/PBM

Configuration of a ELF filter cartridge with 5-way filtration

Made in USA

## Specifications

ELF Filter ELF-P-RA	
Micron Rating	>98% @ 10 _m
Filter Dimensions	3.125" O.D. x 2.875" I.D. x 12.7" L
Chlorine Reduction >95%	>10,000 gallons @ 1.5 GPM
Initial _P	<4.0 psid @ 1.5 GPM
Carbon Weight	0.75 lbs.
Carbon Type	Activated Coconut Shell Acid Washed

Scale Reduction - 6 months

Notes: Chlorine reduction capacity based on laboratory testing conducted using test protocol contained in NSF Standard 42. This filtration block is tested and Certified by NSF International under ANSI/NSF Standard 42 for materials only.
